PROFESSIONAL SUMMARY

Full-stack web developer experienced in Laravel, React.js, and Tailwind CSS, building responsive and scalable web applications with clean and maintainable code. Focused on creating efficient solutions to real-world problems through modern web development.

WORK HISTORY

Full-Stack Developer Intern
Cornersteel Systems Corporation, Mandaluyong City, Philippines

January 2026 – April 2026

- Developed a cooperative loaning application using Next.js (frontend) and Laravel (backend).
- Implemented loan computation logic including interest calculations, payment terms, and eligibility rules.
- Integrated SMTP-based email verification and Google OAuth authentication.
- Collaborated with the team to build scalable APIs, responsive interfaces, and maintainable application architecture.

PROJECT HISTORY

MANHIS MIS (Capstone Project)
Tech Stack: PHP, MySQL

November 2024 – April 2025

- Built a Management Information System for Maternal and Neonatal Healthcare as Lead Full-Stack Developer, handling both frontend and backend.
- Implemented data management, authentication, and administrative modules to support healthcare operations.

YUNHAverse Philippines – Fan Club Interactive Website
Tech Stack: Laravel, React.js, SQL

2025

- Developed a full-stack interactive fan club website for YUNHAverse Philippines, a local Filipino fan community.
- Built RESTful backend with Laravel and dynamic React.js frontend; used SQL for managing fan content and community data.

Personal Portfolio Website
Tech Stack: HTML, CSS, JavaScript, TypeScript

2025

- Designed and built a personal portfolio website deployed at ryanbdorona.github.io.
- Implemented type-safe scripting with TypeScript alongside vanilla HTML, CSS, and JavaScript.
